

RIMAGE ALLEGRO™ SERIES

The Winning Combination: High-Speed Desktop Publishing, Full-Color Inkjet Printing, and Powerful Rimage Software Suite

Rimage Allegro disc publishing systems come complete with industry-leading Rimage software in a cost-effective package – an ideal combination for low- or moderate-volume, quality disc production. Publish discs with professional, full-color labels using the newest generation of high-speed, high-quality inkjet printing.

Benefits

Right Size

Choose the system that best matches your needs. The Allegro 20 – a cost-effective option for short jobs – has one recorder, and one bin that holds up to 20 discs. The Allegro 100 has two recorders, and two bins that hold up to 100 total discs. CD/DVD recorders are standard on both models, with optional Blu-ray™ recorder upgrades.

High Speed

Power through projects quickly while getting full-surface, full-color printing in as little as six seconds: the Allegro's high-speed robotics are designed to maximize production.

Rimage Software Suite

Proven, industry-leading software from Rimage is your ticket to success. Rimage Software Suite (RSS) – refined over decades – provides robust and dynamic features for your affordable Allegro disc publishing system. Grant any network user easy access to your Allegro system with the powerful network capabilities of RSS. The unique ability of RSS to automatically import, or ingest, data - as well as publish data - makes Allegro a perfect fit for small offices or clinics that receive as well as distribute data.

Rimage Software Suite offers the strongest, most fully-featured Application Program Interface (API) on the market. Interconnect with any software program through strong networking capabilities, two-way program-to-program communication, and a full API feature set. Existing Rimage software integrations can get started with an Allegro system right away.

Features

- 20 (Allegro 20) or 100 (Allegro 100) disc capacity
- External disc output allowing both bins to be utilized for input (Allegro 100 only)
- One (Allegro 20) or two (Allegro 100) CD/DVD recorders (Blu-ray optional)
- Rimage Software Suite (RSS)
- Color inkjet printing at up to 4800 dpi
- All-in-one ink cartridge for ease of use
- USB 3.0 connectivity for high speed data transfer
- Internal lighting for status communication
