

RIMAGE PROFESSIONAL™ 3450

Powerful In-house Solution Delivering Quality Results

The Professional 3450 system is a high-performance, front-office solution for automated CD/DVD production. It can also print directly onto the media. Your production workflow will benefit from a fully automated and intelligent in-house robotic solution with a low long-term cost of ownership.

Benefits

Affordable

The Professional 3450 is the most affordable disc publishing system with a thermal printer. It is the easiest way to get Rimage quality publishing in an affordable package. All you need is a PC, the solution software and you are ready to go.

Network connectivity

The standalone Professional 3450 system can be easily networked using an external PC.

Dust cover

With the help of the new ventilation filters, dust contamination in the device is reduced.

Integrated printer

Rimage's Everest® Encore 400 printer is the market's only fully integrated thermal retransfer printer, providing indelible, high-resolution images and sharp, easy-to-read text. Unlike inkjet printing, thermal retransfer printed labels will not scratch, smear, peel or fade over time.

Unmatched performance

The three-bin carousel with optional 50-disc output bin enables multiple discs and media types to run concurrently. Publish up to 50 CD-Rs, DVD-Rs, or Blu-ray Discs™ per hour with hands-free operation.

Features

Backed by decades of experience in designing and building hardware, the Professional 3450 standard features include:

- Rimage Software Suite with unlimited network clients
- Integrated DiscWatch™ status light
- 2 quick-release front-swappable recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External 5-disc output bin
- Integrated Everest Encore 400 thermal retransfer printer
- Internal lighting
- USB 3.1 Gen 1

Options

- Blu-ray recorders
- 50-disc external output bin
